

## REMARKS

Upon entry of this Amendment, claims 1 – 3, 5 and 6 remain pending. Claims 7 – 20 are withdrawn.

Claims 1 – 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Rostoker (U.S. 5,767,570).

Claim 1 has been amended to more particularly define over the art of record. Claim 1 now recites *“An integrated circuit package, comprising: a first non-conductive substrate having a first inner surface; at least one first contact pad disposed on said first inner surface for selective electrical communication with circuit elements through conductors carried by said first substrate; a second non-conductive substrate having a second inner surface; at least one second contact pad disposed on said second inner surface for selective electrical communication with circuit elements through conductors carried by said second substrate; wherein said first and second contact pads are opposed from one another; a die ... and a leadframe including a ... distal end being undulated such that said distal end has a effective thickness greater than said second thickness to effect bridging of said contact pads.”*

Rostoker fails to disclose or suggest opposed contact pads carried on separate substrates which are juxtaposed to be bridged by an undulated (thickened) distal end of a leadframe.

Thus amended, independent claim 1 is clearly distinguishable from Rostoker.

Claims 2, 3, 5 and 6 depend, directly or indirectly, from independent claim 1.

Accordingly, in view of the amendments, it is requested that the rejection be withdrawn.
